

Sherman

Thank you for ordering one of our super comfy Sherman mattresses or a Sherman base. We're in the process of organising delivery to you as fast as we can.

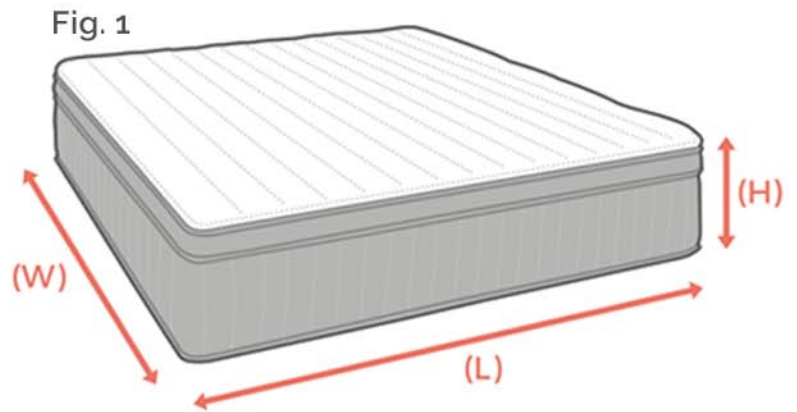

When we get there, we'd love to be able to set the product up directly in your bedroom, without you lifting a finger. Please help us by following our handy guide to make sure that the product will fit into your home.

1 Measure your item

First, scribble down the dimensions of your mattress or furniture in the boxes below (use Fig 1. for help).

You'll find these dimensions on each product page at www.sherman.com.au.

You'll need to refer to these as you take various measurements around your home.

(W) (L) (H)

2 Measure your doorways

The Australian standard size for doors is 2080mm x 820mm, as shown in Fig.2.

As long as the doors in your home are this size at a minimum, then your mattress will fit.

3 Measure your staircase

Using Fig.3 as a guide, measure the height (A) between the ceiling and the stairs at the narrowest point. Record your measurement:

(A)

If (A) is higher than the width (W) of your item, it will fit.

Next, check if your item can be manoeuvred through your staircase landing.

Measure the width (B), height (C) and length (D) of your landing. Record your measurement:

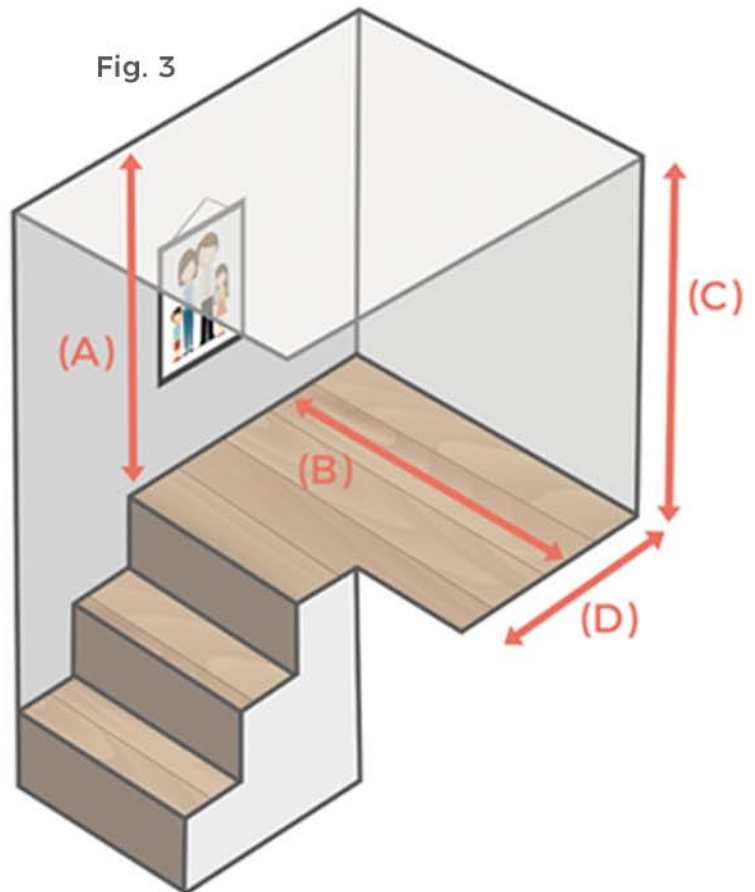

(B)

(C)

(D)

- Is (B) equal or greater than the width (W) of your item?
- Is (C) at least half the length (L) of your item?
- Is (D) equal to or more than the length (L) of your item?

If the answer to all 3 questions is Yes, then your item will fit.
